PROFESSIONAL SUMMARY

M.Tech Computer Science & Engineering student specializing in AI & Data Science with a 9.35 CGPA and a strong foundation in Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, and Computer Networks. Proficient in developing full-stack applications using Java, Spring Boot, React.js, Next.js, TypeScript, REST APIs, MySQL, and Docker. Experienced in building and deploying practical web applications, debugging software issues, and implementing scalable solutions. Passionate about Artificial Intelligence, Machine Learning, and solving real-world problems through technology. Strong analytical, problem-solving, collaboration, and technical communication skills.

EDUCATION

KL University, Vijayawada, AP

Master of Technology (AI & Data Science)
Expected 2027

CGPA: 9.35

Mansarovar Global University, Bhopal

Bachelor of Technology in Computer Science

CGPA: 7.6

SKILLS SUMMARY

- **Programming Languages:** Java, C, Python, JavaScript, TypeScript
- **Computer Science Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Algorithms & Complexity Analysis, Operating Systems, Database Management Systems (DBMS), Computer Networks
- **Frontend Development:** React.js, Next.js, Vite, HTML5, CSS3, Tailwind CSS
- **Backend Development:** Java, Spring, Spring Boot, Node.js, Express.js, RESTful APIs
- **Databases:** MySQL, PostgreSQL, Cloudflare KV
- **Development & Deployment:** Git, Docker, Netlify, Render, Visual Studio Code, IntelliJ IDEA, Google Colab
- **Testing & Debugging:** Debugging, Unit Testing, API Testing, Log Analysis, Test Case Execution
- **AI & Emerging Technologies:** Generative AI, Machine Learning, Data Analysis

WORK EXPERIENCE

ADM Educational & Welfare Society – Full-Stack Developer Intern

March 2024 – Dec 2024

- Developed and maintained application components while troubleshooting software issues across multiple systems.
- Built and enhanced React.js-based user interfaces and contributed to backend functionality for application features.
- Debugged software issues, investigated application failures, and performed functional testing to validate features before deployment.
- Collaborated on application maintenance, issue resolution, and software development tasks to support project requirements.

iLearnings – Full-Stack Developer Intern

June 2024 – July 2024

- Developed reusable and modular React.js components to support scalable and maintainable frontend development.
- Integrated RESTful APIs to enable seamless communication between frontend interfaces and backend services.
- Optimized frontend performance and contributed to the development and enhancement of application features.
- Utilized Git-based version control workflows for source-code management, collaboration, and project maintenance.

PROJECTS

90s Dhaba & GENZ – Music Streaming Platform

Tech Stack: React.js | Vite | Cloudflare Workers | Cloudflare KV | Capacitor | Real-Time Analytics

- Developed a full-stack music streaming platform featuring curated 90s Bollywood music and a dedicated GENZ music section for modern listeners.
- Implemented advanced audio playback features, including playlists, synchronized playback, seeking, and interactive player controls.
- Built real-time visitor analytics using Cloudflare Workers and KV-based heartbeat tracking to monitor active users and overall website visits.
- Implemented a live online-user counter to display the number of currently active visitors on the platform.
- Developed a visitor tracking system to record and display website visit statistics, enabling real-time monitoring of platform engagement.
- Integrated Cloudflare-based backend services to support scalable data processing and real-time analytics.
- Converted the web application into an Android application using Capacitor.
- Deployed and maintained the production platform at 90sdhaba.in.
- Live : <https://90sdhaba.in>

JavaEvaluator – Full-Stack Quiz Assessment Platform

Tech Stack: Java | Spring Boot | React.js | MySQL | REST APIs | Docker | Render | Netlify

- Developed a full-stack quiz assessment platform using Java Spring Boot and React.js to facilitate interactive online quizzes and assessments.
- Designed and implemented RESTful APIs using Spring Boot for quiz management, question handling, and backend application communication.
- Integrated MySQL for efficient data storage, retrieval, and application data management.
- Built a responsive frontend using React.js to provide an engaging and user-friendly quiz experience.
- Containerized application components using Docker to ensure consistent development and deployment environments.
- Implemented backend services using Spring Boot to support scalable application architecture and seamless frontend-backend integration.
- Deployed application components using Render and Netlify for online accessibility.
- Live : <https://javaquizz.netlify.app>

VidSnatch – Multi-Platform Video Downloader

Tech Stack: React.js | Vite | Node.js | Express.js | yt-dlp | REST APIs | Render

- Developed a full-stack, multi-platform video downloader supporting platforms such as YouTube, Instagram, Facebook, TikTok, Twitter, Reddit, Threads, Pinterest, and Snapchat.
- Designed and developed a responsive frontend using React.js and Vite to provide an intuitive video downloading experience.
- Built RESTful backend APIs using Node.js and Express.js for video extraction, media processing, and download management.
- Integrated yt-dlp to retrieve video metadata and support multiple video formats and quality options.
- Implemented backend processing for handling media extraction requests and improving the overall download workflow.
- Worked on video quality handling, error management, and deployment optimization for production environments.
- Deployed the frontend and backend using Netlify and Render to make the application accessible online.
- Live: <https://vidsnatch.fun/>

Personal Portfolio Website

Tech Stack: React.js | Vite | TypeScript | Tailwind CSS | Responsive Web Design

- Designed and developed a modern, responsive personal portfolio website to showcase professional skills, technical expertise, projects, and achievements.
- Built a component-based user interface using React.js, TypeScript, and Vite for a fast and maintainable development experience.
- Implemented a modern UI using Tailwind CSS with responsive layouts optimized for desktop, tablet, and mobile devices.
- Created dedicated sections to highlight technical skills, featured projects, professional experience, and personal information.
- Focused on user experience, visual consistency, reusable components, and performance-oriented frontend development.
- Integrated interactive UI elements and smooth navigation to enhance website usability and engagement.
- Deployed the portfolio website online to provide easy access to professional work and project demonstrations.
- Live: <https://mohddilshadportfolio-32.vercel.app/>

CERTIFICATIONS

Full Stack Developer Certification- Hands-on experience with React.js, JavaScript, backend development, and full-stack application deployment.
